# Multiplication board

This ITP allows you to represent multiplication as the multiple of two numbers in an array.

Click on one number in the top row and another in the left-hand column to mark a square where their row and column intersect.

Click on the marker to create an array which is a multiple of the two numbers you selected.

Alternatively you can click directly on a square to create an array from its horizontal and vertical position.

click on two numbers to create an array of counters

click on a counter to show or hide its value in the array.

Click on any counter to show its value in the array.

Click here to show the value of a square as a counter or a number.
